PREFACE TO THE SECOND EDITION

The First Edition of the *Wiley Trigonometric Tables* contained only six tables. To these, in the Second Edition, have been added four tables which relate to haversines and mils. The new tables were prepared with considerable care to make them as accurate and convenient as possible.

I am indebted to the War Department for use of Tables VIII and IX, with corrections of them up to August 10, 1942. These two tables, without the corrections referred to, appeared as Tables LIII and LIV, respectively, in Technical Manual 5-236 for 1940. For permission to use tables in essentially their same excellent forms I also acknowledge indebtedness to the Dryden Press, Inc., and Professor W. C. Brenke, publisher and author of *Plane and Spherical Trigonometry*, from which I used their Table IV, and to Henry Holt and Company and Professors C. Bell and T. Y. Thomas, publisher and authors of *Essentials of Plane and Spherical Trigonometry*, from which I used their Tables IV and VI.

PREFACE TO FIRST EDITION

In assembling these tables, we have kept in mind three fundamental desiderata: to select those tables which are most appropriate in a trigonometry course; to make them as accurate as possible; and to arrange them in such order and in such type as to afford the maximum convenience to the user.

In addition to those customarily regarded as required in a trigonometry course, the Wiley Tables include tables of powers and roots to facilitate the solution of triangles without the use of logarithms; they include S and T tables for accurate computation with special angles; and they include a set of frequently used constants.

In the work of preparation, several errors in tables that have been widely used in this country were corrected. It is hoped that the Wiley Tables possess improved accuracy.

Table III—Natural Logarithms of Numbers

Base $e = 2.71828...$ NOTE. $\log_e 10 N = \log_e N + \log_e 10$

$$\log_e \frac{N}{10} = \log_e N - \log_e 10$$

$$\log_e 10 = 2.30259$$

$$\text{Examples: } \log_e 35 = \log_e 3.5 + \log_e 10$$

$$= 1.25276 + 2.30259 = 3.55535$$

$$\log_e .35 = \log_e 3.5 - \log_e 10$$

$$= 1.25276 - 2.30259 = 8.95017 - 10$$
